ADV DATA EXCELLENCE 2024

JAKOB LOGAR

KNOW-CENTER GMBH

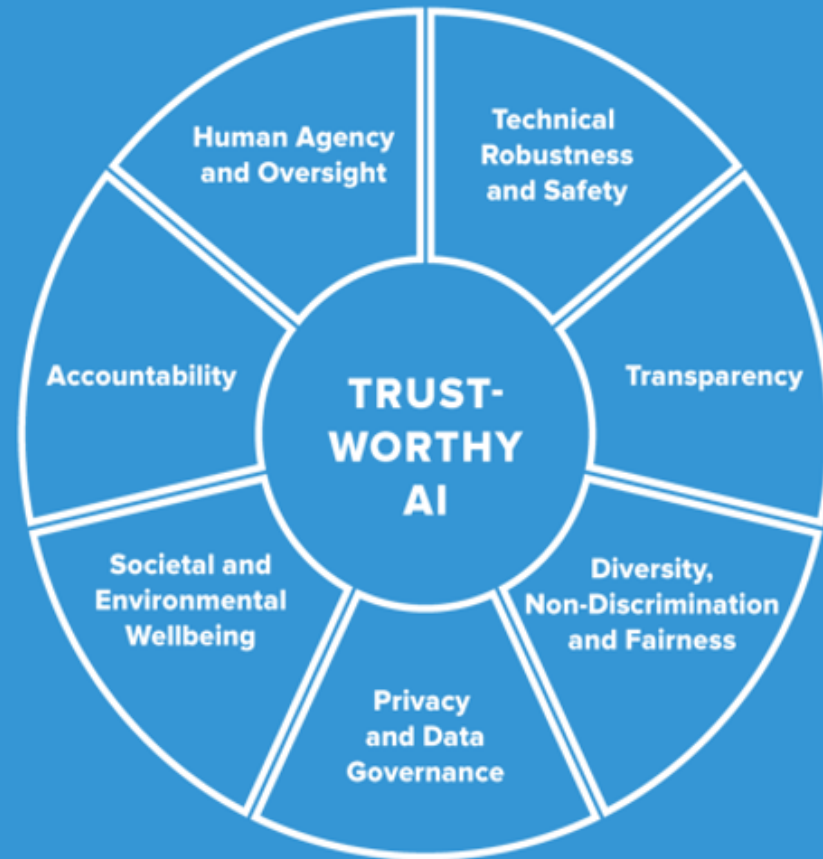

120 ZETTABYTES

Leading European innovation and research center for

Trustworthy AI & Data Science

Automotive, Production & Logistics
Energy, Environment & Sustainability
Pharmaceuticals, Medicine & Health

4 Spin-offs

to provide services and products based on our excellent research and acquired knowledge

>100 employees
from >20 nations

>100 projects
successfully completed industry projects per year

iSpace Label PLATINUM

Awarded by
Big Data Value Association (BDVA)

>120
company partners

>260
scientific partners

>50
publications in outstanding international venues per year

The background features a dark green and blue color palette. It includes a detailed circuit board pattern, a network of glowing green and blue nodes connected by thin lines, and a faint globe. A large, semi-transparent green rectangle is centered on the page, containing the main text.

41 GIGABYTE

Pro Mensch und Tag

“A data space is a **virtual space** that provides a standardized framework **for data exchange**, based on common protocols and formats, as well as **secure and trusted data sharing mechanisms**. The IDS data space is designed to support data sovereignty, meaning that data **owners retain control over their data** and can determine who can use it and under what conditions. This is called **Data Sovereignty**.”
